About Us

We Balaji Minechem are one of the reputed concerns, engaged in manufacturing and supplying premium quality range of raw salt, course salt, de-icing salt, tablet salt, iodized salt, industrial salt and all other forms of salts that have export as well as domestic applications. Incorporated in the year 2011, With the express object of setting up one of the largest fully integrated Salt Refinery, using the latest technologies available in the world, to refine the salt to a very high degree of purity. The sophisticated principles of chemical engineering used by company are the same as favored by the leading salt refineries in Switzerland, Australia, Spain and other European countries. Our production capacity is 1500 MT/day. Being in the business for nearly twenty years plus, we have witnessed the evolution of the salt manufacturing companies in India. We have evolved from a humble beginning to a company that is exporting and supplying to major domestic and international markets. Our arduous effort to supply the hygienically packed iodized salt to our client's has been highly appreciated around the globe. We follow good manufacturing.

Our company incorporates latest production methods to manufacture our edible salt products. After going through the initial stage of drying of sea water it is brought into our state-of-art production unit where it is cleaned for impurities, changes to granulated form and hygienically packaged for delivering. We advice cost effective production methods that results in high quality iodized salt being made available at industry leading prices. Our constant endeavors ensure that our production unit is regularly updated with modern machine that help in faster production.
